

StepTechnica Co., Ltd.

**[2<sup>nd</sup> Edition] Release schedule for evaluation sample and the mass production of MKY40N**

Dear valued customers and business partners,

We have announced the product discontinuance notification of **MKY40** on PDN#20200701E formerly. This letter serves as a follow-up notification updating the latest release schedule for evaluation sample and the mass production of MKY40N which is the recommended replacement for **MKY40**.

Please be informed that the scheduled period may slide due to the recent situation of semiconductor supply chain. We will announce you again when such a situation arises.

1. Affected product

MKY40N

2. Release schedule for MKY40N

Schedule	2 <sup>nd</sup> Revision (Issued on June 29, 2021)	Initial notification (Issued on April 6, 2021)
Preliminary specification sheet (Ver.0.1) release	April, 2021	April, 2021
Specification sheet (Ver.1.0) release	September, 2021	August, 2021
Evaluation sample release	September, 2021	September, 2021
First order start	October, 2021	October, 2021
First mass-produced product release	June, 2022	December, 2021

The scheduled first mass-production release has been significantly changed. The reason for this slide is that the fabrication site has exceeded its production capacity. In accordance with this, we change the schedule for the first order start of MKY40N to be November 2021, and the Last Time Ship of **MKY40** to be the end of March, 2023.

We had planned to release MKY40N timely so that the customers can replace **MKY40** without Last Buy as our intention.

However, this postponed release means that the customers need to take a Last Buy action in order to satisfy the demanded quantity until the first mass-production release.

We are ready to provide the preliminary specification sheet to the customers.

Contact below.

The specification sheet (Ver.1.0) is released after we evaluate the product sample.

The whole quantity of evaluation sample is limited and may be short for your requested quantity. In that case, we provide the sample from the first mass production to fill your required quantity.

The EOL schedule of **MKY40** is shown below for your reference.

Schedule	PDN202106291E (Issued on June 29, 2021)	PDN20200701E (PDN issued on July 22, 2020)
Last Time Buy	November 30, 2021	October 29, 2021
End of Production	March, 2022	March, 2022
Last Time Ship	March 31, 2023	June 30, 2022
